DETAILED ACTION

Current Status

1. This action is responsive to Applicants' amendment of 30 May 2008.
2. Receipt and entry of Applicants' amendment is acknowledged.
3. Claims 17-20 and 22-26 are pending in the application.

The rejections in the previous Office Action dated 03/31/2008 is withdrawn in favor of this rejection.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 17-20 and 22-26 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-18 of US 7,351,339.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patents, each taken individually, disclose a method for the synthesis of a phosphorus compound that further include the use of an auxiliary base to remove the acid generated during the reaction as defined by

Art Unit: 1621

applicants' claims differing in specifics of arrangement to a degree that would have been obvious for one having ordinary skill in the art to form the purpose of achieving acceptable synthesis of a phosphorus compound in order to arrive at the process of applicants' claims with the expectation of success in the absence of a showing of new or unexpected result.
